

The best option for offering your customers self-service chilled natural juice on tap whilst making life easy for yourself.

- Automatic juicer for citrus: Oranges, lemons, limes, mandarins, and grapefruit.
- The machine uses a squeezing system that is unique in the world, cutting the fruit in half and squeezing it without the juice coming into contact with the peel, this means the juice does not pick up any of the oil or bitterness in the peel, so what you get is top quality, 100% pure, natural tasting juice.
- All our machines are constructed with a stainless steel body.
- Top-mounted rotating basket that is part of the automatic feed system. The basket holds up 20 lbs of fruit and when full makes the machine visually attractive.
- Latest generation Digital Programmer and fruit counter for monitoring the number of fruits squeezed, plus a digital display screen that provides information on the machine's operating status.
- Two filter options regulate the amount of pulp retained in the juice, meaning customers can be served juice tailored to their preference.
- Automatic start system activated by pressing the tap.
- Double capacity stainless steel cabinet with integrated refrigeration.
- Drip tray and grille can be set at 3 different heights.
- Buffer brackets protect the machine and provide a minimum space for the air to flow through from the refrigeration unit.
- Fitted with two 13.2 gal bins so the user can squeeze up to 110 lbs of oranges without stopping and with no need to dispose of the waste material created (until juicing is finished).

Fruit size:

Medium-size cup kit Ø 2.16" - 2.95"

Large size cup kit Ø 2.75" - 3.54"

Ideal

- For establishments such as supermarkets, self-service restaurants and hotel buffets serving more than 50 chilled juices a day.
- Heavy level of consumption.

TECHNIQUE CHARACTERISTICS

Measures ⬆️ 66" ⬅️ 31.5"/33" (Brackets-shock) ↗️ 20"/20.9". (Brackets-shock)

Weight 255.2 lbs.

Maximum power consumption 450 W

Refrigeration Group 310W

Agitator 78 W

Condenser Fan 32 W

Fan Cover 32 W

Fruits per minute 11

Capacity basket 20 lbs.

Capacity Tank with Agitator 1.85 gal.

Temperature control Thermostat

Refrigerant R134A

Freigh 3.2 Oz. Aprox.

Voltage 110V 60Hz.

Security

- Automatic triple safety sensor and motor cut-out to prevent overheating. If parts are placed incorrectly the machine stops and a warning appears on the display panel.
- Hermetic compressor with thermal cut-off.
- Motorised agitator with impedance protection.
